LASER-CUT STRINGERS VS. HSS TUBING

VS.

- Made from a single, precisely laser-cut steel plate.
- Offers a sleeker, more modern appearance with intricate design possibilities.
- Highly precise, as the steel plate is cut with extreme accuracy, ensuring consistent quality.

- Constructed from rectangular or square hollow steel tubing, usually welded together.
- Has a more industrial and traditional look, with thinner profile compared to the laser-cut version.
- Requires manual welding and cutting, which can introduce minor inconsistencies.

CLIENT REVIEW

Review final details of the
project

MANUFACTURING

Stairs Manufactured 6-
8weeks upon arrival of
final drawings

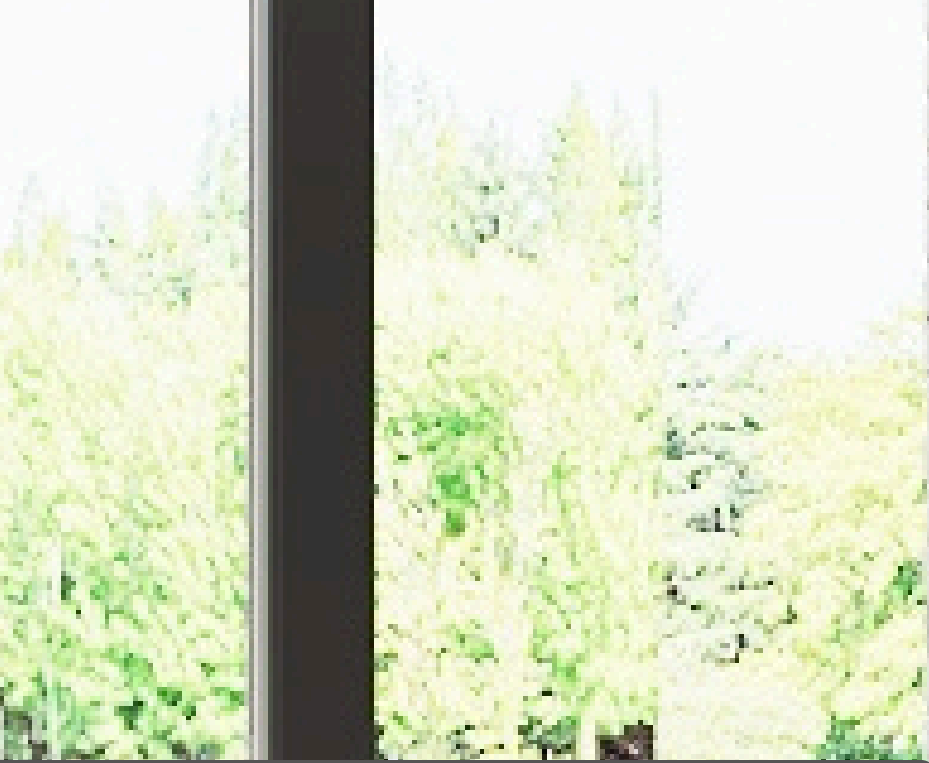

DELIVERY

Stairs to your plant or
construction site

DISEÑO STAIRS

PRODUCT FEATURES

- Laser Cut Sheet Metal Vs Hss Tubing
- Precision Manufacturing
- No Grind Marks & Exposed Welds
- No Exposed Grooves
- No Welding on Site
- Powder Coating/No Paint on Site
- Structurally Sound
- Quick/Hassle Free Installation
